SKILLS

payments · kafka · kubernetes · postgres · reconciliation · reliability · event-driven · idempotency · latency · ledger · type-script · go

EXPERIENCE

Selected experience

- Comfortable with Kubernetes, Terraform, Postgres, Kafka, Redis, Go, TypeScript, Python.
- Rebuilt the payments ledger service at Northwind Pay, moving it from a nightly batch to an event-driven pipeline that settled 4.2M transactions/day.
- Cut reconciliation latency from 6 hours to 90 seconds, which unblocked same-day payouts for merchants.
- Led the migration of the core billing API from a Rails monolith to Go microservices with zero customer-visible downtime.
- Introduced idempotency keys and exactly-once delivery for webhooks; dropped duplicate charge incidents by 97%.
- Mentored 4 engineers, two of whom were promoted to senior within a year.
